About me

I was born in Brescia (I) the 3rd of June 1984, I graduated from Università degli Studi di Parma (I) in December 2009 after an Erasmus experience at Universität Stuttgart (D).

I have had six years of work experience in different architectural offices, where I have designed private and public buildings. I have taken part in the plan of a wide variety of large to small scale scheme. Working on these projects gave me the opportunity to design custom-made furniture, restorations of apartments in the historical center, schools and masterplans. I have also had some experience in architectural contests.

I'm motivated, committed, tenacious, team-oriented, curious and interested in new challenges.

My native language is Italian, but I also speak English and I have studied French and German.

My interests are travelling and expositions, furthermore I'm keen on football, fixed-bike, food, coffee and wine.

Collaborations

April 2012/Still now

Project Architect in Studio di Architettura Jemmi

August 2013/April 2014

Project Architect in Studio BFG

September 2011/March 2012

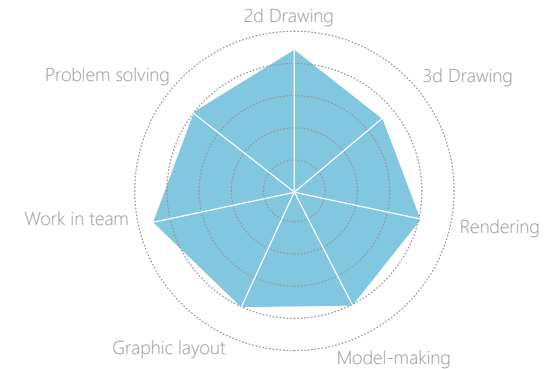

Project Architect in Cortesi Architetti

February 2010/May 2011

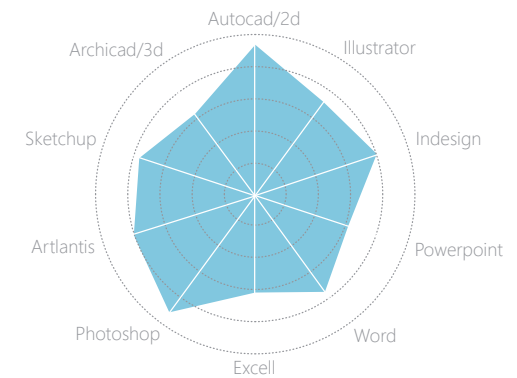

Architectural Assistant/Project Architect in Marazzi Architetti

with: F. Baghino, F. Bianconi, M. Budel, A. Cannavò, P. Iotti, A. Monteduro, M. Pagani, M. Pavarani, L. Serpagli, A. Sportillo, G. Viglioli

CM48 Refurbishment

Lavagna - GE (I)

Client: private
Design Team: Studio di Architettura Jemmi - Arch. I. Iemmi
Arch. M. Pagani
Time Planning: 2014/2015 design
Dimensions: house extension 180 m³
garage: 130 m³

The old house is restored and it is the main reference of the whole project. The plan layout is redesigned to make it more functional and to host a guest apartment. Furthermore the building systems are renewed and improved.

Colours, heights and dimensions are designed to draw the attention on the old building.

The project is composed of: an extension of a house built in 1930s and a garage for two cars.

The scheme is spawned from a very narrow range of possibilities allowed by building code. It wants to create a relationship between the two new realizations and the old house, keeping a recognizable shape and autonomy for the new construction.

Instant House Contest - SPECIAL MENTION

Milan - (I)

Client: Federlegno Arredo s.r.l.
Design Team: Arch. M. Budel
Arch. M. Pagani
Arch. F. Stocchi
Time Planning: 2013 contest
Dimensions: plot area 4000 m²
built area 650 m²

The new Kindergarten hosts three classrooms and public areas designed to offer children safe indoor and outdoor spaces.

The project wants to match needs of a clear and rational geometric composition with necessities of various and flexible spaces.

Every single classroom is composed of:
 3 rooms, a common space, a private toilet and a patio.
 Movable walls allow to organize the classrooms in different ways and wide windows and skylights permit to modulate the light.

Corcagnano Kindergarten

Corcagnano- PR (I)

Client: ParmaZeroSei s.r.l.
Design Team: Studio di Architettura Jemmi - Arch. I. Lemmi
Arch. L. Carriero
Arch. M. Pagani
Arch. A. Piergianni
Time Planning: 2012/2013 design
2013/2014 construction
Dimensions: plot area 6000 m²
built area 1600 m²

The new building hosts a Daycare (4 classrooms) and a Kindergarten (2 classrooms) for 148 children.

The project is spawned from a reinterpretation of the common pitched roof and it is organized in two parallel wings.

The classrooms are composed of two main rooms, a private toilet and a small play space so-called *soft corner*. The main play rooms are two common areas outside the classrooms and they are thought as sharing spaces where children can socialize during the play time.

Trentinosviluppo Stand - Made Expo 2010

Milan - (I)

Client: Trentinosviluppo s.p.a.
Design Team: Arch. F. Bianconi
Arch. M. Pagani
Time Planning: 2011 design
2011 construction
Dimensions: built area 500 m²

The project is a collective stand that hosts 11 firms from Trentino Alto Adige, Trento University and Trentinosviluppo s.p.a.

Every single firm has its own space, composed of a public area and a warehouse, located in the black and white boxes on the stand's perimeter.

Trentinosviluppo and Trento University are hosted in the main space: a secret garden in the middle of the stand.

This space wants to remind woods and valleys of the region and the naturalistic approach that is peculiar of the hosted firms.

ILLE

USI/SUPSI Campus

Lugano - (CH)

Client: USI - Università della Svizzera Italiana
SUPSI - Scuola Universitaria Professionale della Svizzera Italiana

Design Team: Marazzi Architetti - Arch. D. Marazzi
Iotti + Pavarani Architetti -
Arch. P. Iotti, Arch. M. Pavarani
Arch. M. Pagani

Time Planning: 2011 contest

Dimensions: plot area 22.000 m²
built area 26.000 m²

The urban tissue, where the new campus will be built, is very uneven and fragment. The scheme proposed is a texture that wants to generate a new identity for the district.

The campus hosts classrooms, offices and laboratories of USI and SUPSI. It is organized by tower-patio buildings.

The outside areas and the garden-roofs are designed as semi-public spaces.

Furthermore the project wants to create a relationship between the city and the Cassarate river through a public park and a promenade on the riverside.

Al Disco Shop
Verolanuova - BS (I)

Client: private
Design Team: Arch. M. Pagani
Arch. A. Cannavò
Arch. M. Pagani
Time Planning: 2008 design
2009 construction
Dimensions: built area 50 m²

The new shop is thought as a big showcase where the whole space is designed as an exposition area visible from the outside.

The main selling area is the central table, where clothes are stored and shown the customers.

The design of the white costum-made furniture aims to make itself disappear and lets the clothes result.

Reference letter: Prof./Arch. AURELIO CORTESI

Among the many architects who have been my students at the University of Parma and then worked in my office, Marcello Pagani is one of the few who has both deep talent and strong design abilities with a kind and cooperative attitude; the features so peculiar to his personality can be easily expressed in a few words, in order to give a very precise picture of him: a dedicated person who deeply cares about the quality of his work.

He was a student in Architectural Design Studio I taught in his first year at the School of Architecture in Parma, Italy. I was able to follow his growth and improvements during his learning process.

A clever and open minded student. He as well was appreciated for his many and significant human qualities: these were matched by a continuous ability to develop a deep critical understanding as well as an historical analytical attitude which Marcello applied to architectural design process with additional theoretical studies. This, as a professor as I am, is something that I consider very relevant.

I believe that Marcello Pagani can show in his design work, collected in his portfolio, some linguistic and constructive innovations applied both in the design of public space and in the design of private building. His works expresse a very fine capacity from the conceptual idea, in the design process to the structural and advanced technological details.

As a conclusion, I strongly recommend Marcello as a very strong, dedicated person, a valid colleague who can implement the quality and the precision of the design process.

Former Professor of Architectural
Design at the University of Florence
and Parma

Reference letter: Prof./Arch. MARCELLO MARCHESINI

I first became acquainted with Architect Marcello Pagani at the School of Architecture in Parma - Italy, during the Architectural Design Studio II and then I was mentor his for the graduation thesis. During this time I coul see his passion for architecture. Always reliable and on time delivery has been shown to have great skill in three-dimensional modeling and graphic rendering with renderings and models of various sizes.

Furthermore he worked with me during the Territori Oltre lo Stretto Workshop, organized by Università Mediterranea di Reggio Calabria, and in those days I could appreciate his ability to relate to other people and to work in teams with harmony and personality

Professional very interest in architectural issues, he continued his vocational training path through architectural readings, visiting expositions, conferences and attending at workshops. After his university degree we have been in contact with each other and I helped him to choose the studios whom he could collaborate with, considering offices which might be helpful for his human and architectural growing.

As you can see in his wallet can handle projects raning from urban scale to that of the interior

In conclusion I wpuld say that Marcello Pagani proved helpful, punctual deliveries and flexibility in the management of a cooperative project. Careful and precise was able to adress the issues and assign them tasks always showing great curiosity and passion.

I will be pleased to answer any additional questions you may have.
